Software Development:

Web Thriftstore

Charity driven E-commerce site.
Built new features, debugged and re-factored codebase from the front-end (Angular, LESS, HTML5) across the stack to the back-end (Node, Express, mySQL).

CodeStream

Real-time instructional coding application with live updates from instructors, and comment participation from students.
Engineered with Angular, MongoDB, Express, and Node, utilizing Github API, Sublime Text API, and Nodegit module to integrate Github and Sublime Text 3.

Emergency DJ

Browser-based DJ software.
Utilizes the YouTube API to allow users to search, queue, play and crossfade music.

ArtAwesome

E-commerce project allowing users to signup, login, browse, and "purchase" the worlds greatest works of art.
Accesses the Artsy API to populate the database.

Big Star Story

Website for the Documentary film "Nothing Can Hurt Me, The Story of Big Star" at BigStarStory.com
Re-worked styles and layout of the front-end of the website.
